

# 2018

# Facilities Planning Committee

The **PURPOSE** of the Facilities Planning Committee was to study the facility and maintenance needs of the District and make recommendations for a future bond program. The Committee included non-CISD employee representatives from each of the District's feeder zones, along with representatives from community groups and the business community. A schedule of meetings was established with a **GOAL** of providing a report to the Board in December 2018. The Superintendent led the Committee, with support from the Planning and Construction Department, the Maintenance Department and the Finance Department. The District's architectural, engineering, and demographic service providers served as resources to the Committee.
